Industries & Applications

Our solutions ensure efficient and effective Data Collection for Couriers, Airports, Warehouse operators and sorting processes. With best practice Integrated Solutions, robust Project Management, and unparalleled Technical Support for the Transportation and Logistics industries.

Logistics

- Stationary Industrial Scanners
- Industrial Hand Held Scanners
- Mobile Computers

Dedicated Logistics and Third Party Logistics organizations keep commerce in motion moving materials to factories, stock to distribution centres and items to retailers.

Airport

- Mobile Computers
- Stationary Industrial Scanners
- Industrial Hand Held Scanners
- General Duty Hand Held Scanners

To keep travellers moving and tight schedules on time, airports rely on data capture solutions.

Courier & Parcels

- Stationary Industrial Scanners
- Dimensioner's
- Mobile Computers

Enterprises rely on couriers to keep merchandise and materials moving efficiently while maintaining security and traceability.

Pharmaceutical

- Stationary Industrial Scanners
- Dimensioner's
- Optical Character Recognition

Data capture in healthcare assures quality care, effective medications, and safety for patients and providers.

Sync Systems customized scanning, weighing and dimensioning solutions (SWAD) for maximum process reliability and competitiveness.

Sync Systems offers dimensioning solutions powered by Datalogic that work on the principle of time of flight, to accurately measure the dimensions of parcels combined with a very accurate weight scale to provide you with accurate measurement of volume, weight and dimensions of parcels.

Scanning

With innovative new scanning technology, barcode information and images can be transferred to your IT Database or any PC as required. With a modular design, multiple XRF410N solutions can be combined for applications with wide conveyor belts or multi-side reading.

Weighing

Sync Systems offers both dynamic and static parcel weighing systems with seamless integration into any sorter, conveyor or production line.

Dimensioning

The DM3610 2-head system is a high-performance in-motion dimensioning system that provides the length, width, and height of both cuboidal and irregular objects. The system is certified for Legal-For-Trade applications and its highly accurate measurements make it the perfect solution for spatial management applications.

Integration

Sync Systems ensures the highest level of compatibility and openness to industry standards with flexible software solutions. Seamless integration to databases and 3rd party industrial interfaces and protocols. Easy integration in any industrial installation.

Portable Parcel Scanner Solution

The Sync Systems Portable Parcel Scanner is a cost effective dimensioning system (dimensional weighing) for efficient dimension and weight capture in receiving, shipping and POS desk operation. The mobile unit is suitable for warehouse inventory. Easily move and collect master data (weight, dimensions etc.) from your products to your WMS or ERP system.
